## L'UVAGGIO DI GIACAMO

l'Uvaggio di Giacomo was begun in 1997 to craft distinctive wines from the notable Piemontese grape varieties Barbera and Nebbiolo when grown in California. Continually inspired by the efforts from best producers of Piemonte, both those following the more traditional methods and the new wave of modernists, we undertook our exploration and aspired to make an impact with grapes grown here. Also the recent wines from the finest producers of Tuscany intrigued us to produce our own Sangiovese starting in 1999. Observing their efforts and tasting the wines from many of the best Tuscan estates convinced us this is another very interesting variety.

We have applied our years of experience working with Italian grape varieties from throughout California and Italy to craft our wines.
